

# Total Return Bond Fund

## INVESTOR CLASS ACCUMULATION AND INCOME SHARES

### Fund Description

The Total Return Bond Fund is a diverse portfolio of intermediate-term, investment grade securities, actively managed to maximise total return while minimising risk relative to the benchmark. The Fund invests primarily in US government, mortgage and corporate bonds, but may have tactical allocations to municipal, high yield and non-US markets.

### Potential Investor Benefits

This Fund is an actively managed portfolio of core bonds that employs prudent risk management and seeks to maximize total returns in all market conditions.

### Potential Fund Advantage

The Fund takes a long-term view and uses multiple concurrent strategies to limit the likelihood that any single strategy that falls out of favor would negate the positive returns from other strategies.

### Risks of Investing

Unit value can go up as well as down and any capital invested in the fund may be at risk. The fund may invest in non-U.S. and non-eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Prospectus and Key Investor Information Document.

## ABOUT THE BENCHMARK

Bloomberg Barclays U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus or in the relevant key investor information document, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.<sup>7</sup>

<sup>†</sup> Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. Yields reported gross of fees, the deduction of which will reduce the yield. <sup>‡</sup> Annualised Distribution Yield is as of last quarter ending 03/31/2021. <sup>‡</sup> Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only.
