

US Short-Term Fund EUR (Hedged)

E CLASS ACCUMULATION SHARES

Fund Description

The PIMCO GIS U.S. Short-Term Fund is designed for investors who seek enhanced returns over traditional cash investments in exchange for a modest increase in risk, capital preservation, and daily liquidity. The fund is an actively managed short duration strategy that invests primarily in both high quality money market instruments and short-term fixed income securities.

Potential Investor Benefits

This PIMCO GIS U.S. Short-Term Fund seeks to maximize current income while providing greater liquidity and principal stability than longer duration bond funds. The PIMCO GIS U.S. Short-Term Fund may lose value and will be more volatile than traditional cash investments.

Potential Fund Advantage

The fund seeks to maximize current income by expanding exposure across a global fixed income opportunity set.

Risks of Investing

Unit value can go up as well as down and any capital invested in the fund may be at risk. The fund may invest in non-U.S. and non-eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Prospectus and Key Investor Information Document.

The benchmark is the ICE BofAML 3-Month Treasury Bill Index (EUR Hedged). All periods longer than one year are annualised. SI is the performance since inception.

ABOUT THE BENCHMARK

The ICE BofAML US 3-Month Treasury Bill Index (EUR Hedged) is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date. While the index will often hold the Treasury Bill issued at the most recent 3-month auction, it is also possible for a seasoned 6-month Bill to be selected.

Unless otherwise stated in the prospectus or in the relevant key investor information document, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes. [†]
