

# Global Investment Grade Credit Fund

## E CLASS ACCUMULATION AND INCOME SHARES

### Fund Description

The Global Investment Grade Credit Fund is an actively managed portfolio that invests primarily in investment grade global corporate instruments. The fund is diversified broadly across industries, issuers, and regions on the basis of PIMCO's top-down and bottom-up processes.

### Potential Investor Benefits

The fund offers diversification benefits and greater income potential relative to government bonds or domestic corporate strategies while seeking to retain many of the defensive features of government bonds.

### Potential Fund Advantage

The fund looks to benefit from PIMCO's investment process, which combines our global top-down views on the macroeconomic environment with independent bottom-up security analysis. PIMCO's investment team has the experience and depth to actively manage a broad and diversified opportunity set.

### Risks of Investing

Unit value can go up as well as down and any capital invested in the fund may be at risk. The fund may invest in non-U.S. and non-eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Prospectus and Key Investor Information Document.

<sup>†</sup> Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. <sup>‡</sup>Yields reported gross of fees, the deduction of which will reduce the yield. <sup>‡</sup>Annualised Distribution Yield is as of last quarter ending 06/30/2021. <sup>‡</sup>Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only.
